snow storm, at Sacramento, ail the afternoon of Sunday last. The hearts of the farmers have been made g'ad by the rains, and expres-sions of thankfuluess are coming from all quarters of the interior. The new

year has opened happily for Califor-nia. The parties who were arrested for the robbery of the postoffice at San Buenaventura were discharged Saturday. It is claimed four men were concerned in the robbery—a United States official, a county officer and

two others. Teams are here, says the Calico (A T.) Print, from the borax fields after the immense iron tanks to be used in the manufacture of borax; also a halfmile of iron pipe to convey water from the artesian wells to the reduction

works. A six-mule team with a wagon-load of lumber fell down a steep grade near Wright's, Santa Clara county, last week. Five of the six mules were killed or injured. The driver's head struck on a rock, and he lay insensible for two hours in the road before discovered.

The Placerville Democrat reports that a ledge of high grade sulphuretted copper ore, four feet thick, has been discovered near Garden Valley, and near by is a ledge of quartz freely in-terspersed with copper, containing also a good prospect in gold.

A mysterious and fatal disease has appeared among the poultry at Mon terey. Fowls which have been fed heartily in the evening are found dead under their roosts the next morning, nor is there in the appearance of their bodies externally any manifestation of disease. many people are doing. They don't know just what is the matter, but they have a combination of pains and aches, and each month they grow worse.

The only sure remedy yet found is Brown's Iron BITTERS, and this by rapid and thorough assimilation with the blood purifies and enriches it, and rich, strong blood flowing to every part of the system repairs the wasted tissues, drives out disease and gives health and strength.

This is why Brown's IRON BITTERS will cure kidney and liver diseases, consumption, rheumatism, neuralgia, dyspepsia, malaria, intermittent fevers, &c.

Mr. Simon Blanchard, a well-known citizen of Hayesville, Meade county, Kentucky, says: "My wife had been sick for a long time, and her constitution was all broken down and she was unable to work. She was advised to use Brown's Iron Bitters, and found it to work like a charm. We would not now be without it for any consideration, as we out it for any consideration, as we consider it the best tonic in the world."

Brown's IRON BITTERS is not a drink and does not contain whiskey. It is the only preparation of Iron that causes no injurious effects. Get the genuine. Don't be imposed on with imitations.

## WHO IS FITZ JOHN PORTER

The celebrated case which has made the name of Fitz John Porter so familiar to the American people is attracting more attention than ever. Up to 1863 no officer of the army stood higher as a soldier, and no one had been more distinguished by patriotic and valuable services. General Porter was of a family eminent for services to the country in ihe army and navy. A young lieutenant, he served through the Mexican war; twice brevetted for for gallantry in battles, and wounded in the last battle, at the City of Mex ico, in which every other officer of his company was killed. He served in Kansas during the border ruffian war, and was Chief of Staff to Albert Sidney Johnson in the Utah campaign. When secession became threat ening he was taken into the confidence of the authorities. He inspected the forts of Charleston harbor. He was sent to Texas, in apprehension of the secession of the State, and the treachery of General Twiggs. He reached Indianola on the steamer Webster with 120 recruits, and found that the State had seceded, and that Twiggs had surrendered the public property to the State Commissioners. The rebel Commissioners demanded of Porter the surrender of the steamer with all on board, including \$40,000 in gold. Porter answered that he would defend the ship, and, if necessary, would throw the gold overboard. While the Commissioners hesitated Porter hired the steamship Star of the West to take such troops and batteries as the Webster could not receive, and by night all were off. At that time the administration and the statesmen of both parties were cowed by fear of "firing the Southern heart," and were talking only of compromise. Porter was taken into the confidence of the Lincoln administration, as he continued in that of General Scott. When the Baltimore riot broke out Secretary Cameron and General Scott sent him to protect the Baltimore & Harrisburg Railroad frem the rebels. Getting from Governor Curtin at Harrisburg, a body of 90 day volunteers, and hastily arming them from wherever he could get arms, he stopped the destruction of bridges, and was preparing to open communication with Washington when all the troops were ordered by the President back to York, Pa. The authorities at Washington had weakened and agreed that the troops should come round by water to Annapolis. While communication with Washington was cut off Governor Curtin heard of the danger that the arsenal and public ty of St. Louis would be seized assumed the responsibility and telegraphed orders to Captain Lyon to muster in the volunteers, arm them, and protect the public property. The war generation will remember that Porter was esteemed one of the most gallant Generals in the Army of the Potomac. The 5th Corps had that confidence in their commander which gives invincibility. It had a record in the battles of New Bridge, Hanover Court House, Mechanicsville, Gaines' Mill. Turkey Bridge and Malvern. At Gaines' Mill Porter's corps of 27,-000 men was left on the east side of the Chickahominy to meet the attack of Lee and Jackson's united armies of 65,000 men, while McClellan on the west side was starting the retreat to Porter fully understood through the night of the 26th of June, was one to test moral courage. One-third of his corps fell in that bloody battle. but it repulsed every assault through the long day, and in the night withdrew across the river. Passing to the advance of the fighting and retreating army he timely seized the position at Malvern Hill, from which Lee's army, McCaull Wall, the actress who some flushed with the confidence of pursuit, was repulsed with terrible slaughter. General Porter was born in Portsmouth, N. H., in 1822. His court martial for avoiding all participation in Pope's campaign resulted in his being cashiered on Jan. 1, 1863. Onr readers are familiar with the facts as well as his efforts to have the sentence

THE KANAKA KING LECTURED

Mongolian Who Declines to Dine With the President.

BRIEF SKETCH OF CAMBETTA

Interesting Items of Foreign Domestic News.

Press Dispatches to Evening GAZETTE

Seasonable Lecture-The Pomp Fuss and Extravagance of Ridiculous King. New York, Jan. 3.

The Herald says editorially: The telegraph brings us from San Francisco at somewhat too frequent intervals of late, accounts of the splendors of the coming coronation of King Kalakaua. We are surprised that American and other foreign residents of the island have not long ago got tired of the absurdities and extravagances of this ridiculous king. Those island rulers who were of pure native blood retained the character of chiefs of their people and their rule was not without dignity and not without purpose. Kalakaus inherits from his negro father a tendency to extravagance, pomp and fuss which makes him not a ruler, but a tiresome and costly nuisance. We advise American residents on the islands to take him in hand before he has time to ruin material interests and bring distress upon the native popula tion whom he is misusing like the demagogue that he is.

The resources of the Sandwich Is lands are extremely limited. Kala-kaua is daily wasting them. Not long ago he tried to raise a public loan of \$2,000,000. Fortunately for the interests of the foreign residents and natives alike he found no one so foolish as to lend this sum upon the security of a country which will be bankrupt if the reciprocity treaty is not continued, and whose present debt of a quarter of a million is more than it can repay out of its income in a hundred years without oppressive taxation.

It is time that foreign residents of the islands, and particularly Americans who make up the greater number, should put an end to Kalakaua's wasteful fooling. They have influence and force enough to dispossess this miserable half-breeds from his sham kingship whenever they want to do so. They may not think it judicious to go so far as that now, but they owe it to their own manhood and to the se curity and prosperity of the islands to force him to stop his wasteful and re-diculous course, and if he will play at king, to do so with some sort of sense and moderation.

Matters have gone so far on the islands within a year or two that they need the attention of our own Gov-ernment. We should like to know that a powerful American war-ship were ordered to be constantly in the harbor of Honolulu for the protection of our own people on the island; and not only that, but the captain of the ship ought to have orders to give his countenance and assistance to any step which the misconduct of Kalakaua may compel foreign residents to take for their own protection, even if they should go so far as to expel Kalakaua from his so-called palace and set up a useful and sensible gov-erument of their own. They will have to do this before long and there are by Governor Jackson's militia. Porter the islands sufficient to do this useful and necessary work which is demanded for the safety of the native as well as the foreign population.

> A Stuck up Heathen Who is Too Good to Dine With the President of the United States. WASHINGTON, Jan. 3.

The Japanese Prince who spent Christmas here is not at all inclined to be social with Americans. Evidently he considers himself too great a man to hobnob with the distinguished people of this country. He so far as to refuse an invi-tion to take dinner with President Arthur, for no particular reason save it did not suit his convenience. He also took special pains to snub Gen. Van Buren, Consul at Tokio, who rec ently returned to this country. He did not invite him to any of his din. ners and positively refused to allow the James. This situation, which him to accompany the party that went down to Mount Vernon in the early part of the week. Gen. Van Buren is well acquainted with the Prince, and occupying the position he does, it is considered strange that he should have been so slighted.

Our Ironclads -- It is Recom that They be Completed. WASHINGTON, Jan. 3.

Reno Evening Gazette ELECTRIC FLASHES Monadnock. He accompanied the re port with a message endorsing the ecommendations of the Board. In Secretary of the Treasury to Congress last month he asked for an appropriation of \$3,165,000 for completing the hulls and providing machinery for these monitors. The Secretary of the Navy, in his annual report, estimates that \$1,582,500 would be sufficient. to fully carry out this work. The report of the Advisory Board says that its members have examined all the monitors except the Monadnock. Reports of previous boards appointed to inspect these monitors, as well as all literature attainable relative to the construction of foreign armored vessels, have been read, and after careful investigation it is deemed wise and expedient to complete the monitors. Their hulls are pronoun-ced in excellent condition and the launching of the Puritan and the sea test recently given the Miantonomah have proved the correctness of their designs. The board is convinced tha the monitors can be completed with-out change of design and when finish ed will be the couals of any ironbe the equals of any ironclads designed before 1879. The cos of finishing them will, it is said, not be exorbitant. The Board before the end of the month will submit complete and detailed plans and estimates for the completion of the vessels.

## The New-Style Envelope.

WASHINGTON, Jan. 3. The Postoffice Department has conracted for a large quantity of new style postal cards or combined letter and envelope. Fears have been expressed by some postal experts that it would interfere greatly with the rev-enue department, especially if a re-duction of postage to two cents is adopted. But those in favor of the new cards reply that similar fears were expressed when postal cards were first proposed, and then, as now, letterostage was three cents. Should a reduction be made larger letter sheets and envelope combination with two cents stamp upon them would be among the things to follow.

THE GREAT FRENCHMAN. ambetta's Remains.- A Pisto

PARIS, Jan. 3. Decomposition of Gambetta's budy, hastened by muggy weather, has been fearfully rapid. The aspect of the face has become so shocking that the idea of having the body lie in state in the Palais Bourbon is abandoned. Watchets by the corpse have to keep wadding saturated with disinfectants to their noses. Gambetta's father has onsented to a State funeral. The French Government will devote 20,-000 francs to meet the cost of the funeral. At an autopsy held to-day the top of the head was removed and the brain extracted. The latter will be given to the Anthropological Society. The official report of the autopsy shows there has been a long-standing inflammation of the bowels, which led to contraction of the small intestines. The autopsy proves that the pistol wound received mouth ago had no connection with the cause of Gambetta's death. Telegrams of condolence have been re ceived by the family. The body will be eventually removed to Nice. PARIS, Jan. 3.

Strenuous efforts are making to procure a judicial investigation of the circumstances under which Gambetta received his wound.

CHICAGO, Jan. 3. The Tribune has a long letter by telegraph from Hon. E. B. Washburne of San Antonio, who gives reminis-cences of Gambetta while Washburne was Minister to France. He says s great light has gone out, and the world loses one of the most gifted, brilliant and eloquent men of the age. He was distinguished even in 1869, though a young member of the Chamber of Deputies, and was in the front rank of the little band of able and courageous men who made face against the empire in the pride and arrogance of its power. He was concerned in those turbulent and exciting scenes in the Chamber before war was declared and the empire fell. He was cool
when the people broke up the Chamber of Deputies and flocked to the
Hotel de Ville, where
ment of the Emperor was to take place. Appearing at one of the windows of the Palace Gambetta proclaimed the republic of France and threw to the crowd below little lists containing the names of deputies who were to constitute the provisional government of France un name of the Government for the National Defense. Such a shout of deliverance went up from the great throng as has rarely been heard in the world's history. The new Ministry with Gambetta at its head immediately took possession of their port-folios. He relates his own difficulties in protecting German interests there while the empire lived, and the astonishing grasp with which Gambetta at once understood the whole question. Calling on him he found a oung man of ordinary hight and size he afterwards became heavy), with fine manners agreeable address, bandsome face, long, black, glossy hair and full beard. He did everything pos-sible and did it immediately to mitigate the troubles of the Germans Gambetta being selected as a representative to the Tours Mission, he did not shrink from the hazardous trip from the city in a balloon and made the long trip safely. He soon became, in fact, Dictator of France, and the true history of that Dictatorship has got to be written. It will become one of the most in-teresting episodes in the history of Single-handed, alone, aroused the drooping spirits of the people, raised and equipped armies and accomplished all that mortal could in stemming the tide of disaster which was overwhelming the country. He raised and disbursed the millions gotten through Morgan & Co. in England, and the most rigid examnation of his affairs by enemies when the war was over only showed his hands were clean and his record unstained. After the war his advice was sought more than any other man's. The greatest speech of his life was that made at Versailles on the occasion of President McMshon's coup d'etat in turning away his Re-

Carson is now reaping her bi-annual harvest, and the whole State, or repesentatives from every section, are ontributing their mite to the coffers of that usually quiet, but pretty little city. A GAZETTE representative spent last Sunday and Monday at the Capitol gathering news for the GAZETTE's readers. He found the hotels full of strangers from all parts of Nevada, and not a few from California. The business of Carson, with perhaps a few exceptions, has been partially paralyzed for a year or more and real estate values have depreciated largely. There are a great many vacant bouses that can be bought for 20 per cent. of "That butter is all right," said a that can be bought for 20 per cent. of boarding-house keeper; "it is firkin butter, and tastes a little of the wood, Mason & Co., Geo. of excellence, and has made A MOST EFFICIENT WARDEN.

In this connection it may be well to say that the Republicans must use excellent judgment in selecting a candidate as his successor if they ex-pect to elect him. Warden Garrard will make a splendid showing. His administration has been very successful; in fact, nearly perfect. He has used good judgment in looking after the many duties of this important of-fice and deserves great credit. The place is as clean and neat in every department as soap, water and muscle can make it. The prisoners are as contented as men deprived of their liberty could well be, and look heatlhy. The shoe shop has been well conducted and foremsn Burlington has man-ufactured nothing but first-class goods which Warden Garrard has disposed of. They only have about \$4,000 in manufactured stock on hand. At the present time there are but 113 convicts, and at the January meeting of the Board of Pardons that number will most likely be reduced some. His appropriation was \$100,000. Of this amount about \$98,000 has been used. The number of convicts for the two years will average probably 125 to 126, about 20 less than under Batterman's administration. Garrard expects his party to stand by his official record, and if eight Republican members think him as good as anybody else and think it for the in-terest of the State to retain him he

will of course accept the trust for another term. There are SEVERAL CANDIDATES

Lieutenant-Governor Laughton will likely enter the contest as a candidate from Ormsby county. The fight for this position will be lively and interesting. The Democrats, however, have not abandonedall hope of electing Garrard. The men engaged in constructing the wagon-road to the Mount Cory mine have infused new life into the village, which on Sundays presents quite a breezy aspect. Hawthorne will very likely be a thriving place next season. Some good mines will doubtless be developed in the neighborhood—perhaps as promis-ing as the Mount Cory, which has opened out finely and already shows a respectable bonanza.

Fighting Frenchmen. Two Frenchmen had a lively little scrimmage last night—a sort of cat-General's office, and seemed to be each other, but they scratched, bit and rated several times, but as often renewed the quarrel. This morning institution up to its former stand and they looked as if they had been shaved with a buzz-saw. They got into an argument about Gambetta. One was a red-hot Communist, the other Bonapartist, and they assimilated like fire and gunpowder.

# Too Much Sand.

It is a good thing to have sand in the craw, but not too much of it. In the San Joaquin Valley many horses have died of a mysterious complaint which none of the verterinary surgeons recognized. An autopsy was performed on one of the animals, and owed the stemach to be partly filled with sand. After the late rains the grass started, but was so short that in nibbling it the horses took in a sufficient quantity of sand to prove

The "Magie Doll."

The Boston Comic Opera Company will present the "Magic Doll" at the Nevada Theatre to-morrow night, which promises to be the musica treat of the season. The company is spoken of is terms of excellence, from a dramatic as well as a musical standpoint. There will no doubt be a large attendance. The box sheet is open a the postoffice.

Fire in Truckee.

A fire broke out in the Chine quarter of Truckee this morning about 3 o'clock, and about one-half of the shanties were burned. Most of the Chinese merchants saved their stocks. White folks did not afford the Celestials much assistance, choosing rather

Its Incalculable Worth to the Mining and Agricultural Country of

A reporter of the Inyo Independent ecently interviewed H. M. Yerington and R. J. Laws, of the Carson & Colorado railroad, while they were visiting Independence, California. That paper Tuesday, when they met and granted publishes some interesting facts and statements relative to the country this road is now opening up. They report They also allowed the following bills: their surveys now completed to Owens lake, and the actual grading done to about four miles the other side of freight depots opposite Bishop Creek by the middle of March, leaving themselves until June 1st to make the 40 miles down to near Independence, or about the central part of the valley. The route, skirting along the base of the Inyo range on the east side of the river, is almost level. The MATERIAL PROGRESS

And development of the country, traversed by the 200 miles of road already constructed is almost marvelous. Old mining districts which have since the days of the first silver discovery lain idle and abandoned to aborigines and coyotes, have sprung into life. New and costly roads have been built in all directions from the various stations, enabling the prospector to bring in, sell and realize on his ore, in lots large or small, and obtain the necessary outfit of grub and tools for the development of future bonanzas. The company, of conrse, encourages the ore buyers, who accumulate quan-tities and take advantage of car load rates on their shipment to the several reduction works. These are located in Reno, Dayton, Oakland and San Francisco. As to their

INCOMING PREIGHT, Bliss & Yerington own the great tim-ber tracts surrounding Lake Taboe, the Bodie and Benton Railroad and much of the forests surrounding Mammoth. Consequently they will use their own railroad ties, timber and lumber for buildings, and will have supplies for this entire region-mining timber and lumber at about \$40 per thousand feet, cordwood at \$10 and fencing at proportionate rates. Coke, all the way from England, is to be got here for smelting purposes at a much less cost, all things considered than our nut-pine charcoal can be economically utilized. Mr. Yering-ton stated also that his company has at Carson one of the best outlitted machine shops and iron foundries on the oast, with men in charge whose business it is to build reduction works of any and all kinds anywhere on the line. The gentlemen express the learned about the mineral and agri

portant Industry. In the line of animal husbandry there is nothing which presents more attractions than that of raising and breeding sheep. In Texas and Colorado this industry has assumed proportions which are astonishing. In the former State there are new over 6,000,000 sheep, and the improvement in quality is as marked in the flocks as in the great cattle herds where there has been a yearly decrease meated native stock. Within the past two years many enterprising herd men have disposed of their cattle and are now going into the business of raising sheep, and recent importation of fine-wooled rams indicate that the business is yet in its infancy. Northern breeders of good sheep cannot supply the demand for the best bred stock, and the time cannot be far distant when this immense growth, in number and quality, will have its effect upon the importation of Europea In conversation with a gentleman well known as a breeder of fine wool sheep, a representative of the Prairie Farmer obtained interesting data in regard to this industry. From reliable information the ge gave it as his judgment that the shee industry in the entire country would within 10 years largely exceed, both in numbers and the quality of its yield, both in wool and mutton, that of the whole world, excepting, per-haps, Australia. In his opinion the time was not far distant when American wool would be as good as that of any country in the world, and the in-troduction of more of the best mutton sheep would at the same time produce mutton equal in quality and flavor to the famous Southdowns of England.
